EDUCATION

- **University of Toronto** Toronto, Ontario
Master of Engineering - Electronic Computing Engineering; GPA: 3.97/4 Sep 2023 - Dec 2024
- **Simon Fraser University** Burnaby, British Columbia
Bachelor of Science - Computer Science; GPA: 3.59/4.33 May 2019 - Dec 2022

TECHNICAL WORK EXPERIENCE

- Software Developer** Shanghai, China
SAP Full-time Co-op Oct 2021 - Mar 2022
- Spearheaded the front-end development using **SAPUI5** and Fiori UI, successfully replicating the legacy application's interface within one week, ensuring a seamless user experience.
 - Quickly gained proficiency in **ABAP** programming within two weeks and led the backend refactoring by redesigning and optimizing the project's CDS views with advanced keywords and techniques.
 - Conducted in-depth research on the RAP framework and implemented the RAP unmanaged transaction model, significantly improving the "draft" functionality and fostering **Agile-driven** continuous enhancements.

TECHNICAL PROJECTS

- Full-stack Developer** Simon Fraser University
Dataprep.Clean (SoSy Capstone) Jan 2022 - Sep 2022
- Implemented the clean **JSON** function on the back-end using **Python** and refactored the back-end codebase.
 - Developed and maintained the old GUI, and designed the basic new GUI of the clean application based on the mockup discussed with the professor using **Vue**.
 - Researched pre-compiled libraries and integrated the submodule using precompiling C extensions, eliminating the need for users to preinstall dependent libraries in Dataprep.clean.
 - Used **Git** to maintain the repository, ensuring code stability and streamlined collaboration.
- Full-stack Developer** Simon Fraser University
Reversi May 2021 - Sep 2021
- Developed the user profile using **TypeScript** and **React**, and utilized **Formik** and **Yup** for form validation.
 - Implemented the back end using **Flask** and **Python** to process user input, perform calculations with the MCTS algorithm, and store user information and scores in **SQLite**.
 - Improved the calculation performance and speed by **rabbitMQ**, which connected the RPC client (Python) and RPC server (**Golang**).

TECHNICAL SKILLS

- **Programming Languages:** C/C++, Python, Java, Rust, TypeScript/JavaScript, HTML, CSS, SQL, ABAP
- **Frameworks Libraries:** React, React Native, Node.js, Flask, Vue, Formik, Yup
- **Tools Platforms:** Docker, Git, Android Studio, RabbitMQ, MongoDB, Figma, SAPUI5
- **API Development:** RESTful API design and implementation
